DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 14-16 and their dependent claims 11-13 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: inventions in group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make other and materially different product such as electrode for a field effect device.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 14-16 and their dependent claims 11-13 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

2. Applicant's election with traverse of 2/19/04 is acknowledged. This is not found persuasive because the reason for restriction has been provided in the restriction paper sent 10/29/03 as inventions in group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the

product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case the process can be used to make other and materially different product such as electrode for a field effect device.

In addition, applicant's combination/subcombination arguments are not persuasive in overcoming the restriction because the examiner's reasons for restriction are not based on combination/subcombination reasons. Restriction properly provides reasons for restriction by showing distinctness between groups of invention as shown above.

The requirement is still deemed proper and is therefore made FINAL.

3. claims 1-10 remained allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
